HAMMERTON STUDIO

EXTRAORDINARY DESIGN VALUE IN AMERICAN ARTISAN CRAFTED LIGHTING

When we launched Hammerton Studio in 2014, we saw an enormous opportunity to raise the bar in decorative lighting. To lead in design, rather than follow. To showcase Hammerton's renowned reverence for time-honored craftsmanship and authentic materials. To provide highly reliable lighting solutions that far exceeded industry norms for aesthetics, function and quality.

After nearly a decade of remarkable growth, it's clear we are on the right track.

Hammerton Studio stands on the shoulders of 28 years of innovation in custom lighting design. Each collection has been inspired by custom work Hammerton has brought to life in collaboration with leading design professionals over the years. Every fixture reflects the uncompromising design and detail that Hammerton is known for.

Bottom line: we believe you won't find this level of design value in American artisan crafted lighting anywhere else.

HAMMERTON STUDIO FINISHES

At Hammerton we’ve pioneered an innovative finish process that combines the rich color, depth and character of traditional wet coat paints with the rugged durability and environmental friendliness of powder coats. So indoors or out, your finishes will perform beautifully for a long, long time. We guarantee it.

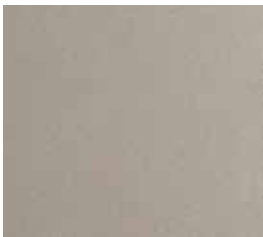

Our all-climate AAMA-2604-rated outdoor finishes are specially formulated to withstand harsh coastal, desert, mountain and tropical climates, and all of our finishes can contribute to U.S. Green Building Council LEED credits.

When selecting finishes, it’s always a good idea to ask your Hammerton representative for actual samples. While the swatches shown in these pages closely approximate our finishes, they may not be exact due to the inherent limitations of photography and printing.

STANDARD METALLIC FINISHES

Combining lustrous beauty with rugged durability, our eight metallic finishes are ideal for every space in the home, in any climate. They’re also environmentally compliant and can contribute toward LEED credits. Best of all, they’re guaranteed for as long as you own them.

- ✓ Rich Color & Character
- ✓ Superior Durability
- ✓ Green/LEED Compliant
- ✓ Lifetime Limited Warranty

BURNISHED BRONZE (BB)

PREMIUM TRANSLUCENT FINISHES

Offered as a premium option with many Hammerton Studio products, our four translucent finishes capture the visual appeal of plated finishes while also showcasing the fixture’s unique craftsmanship. Subtle yet intentional color variations reveal the artisan’s work forging, hammering, hand-graining and polishing the underlying steel. On fixtures that use multiple substrate materials, the artisan nature of our translucent finish process can result in slight tonal differences within an acceptable range.

Translucent finishes are ideal only for dry-rated applications. They are not recommended for coastal installations and high humidity climates where salty air and moisture content can accelerate finish corrosion, even on interior fixtures.

- ✓ Rich Color & Character
- ✓ Green/LEED Compliant
- ✓ Five Year Limited Warranty*

* Applies only to dry-rated installations located 10+ miles from a coastline.

ALL-CLIMATE OUTDOOR FINISHES

AAMA 2604 CERTIFIED

No outdoor lighting solution is as durable or long-lasting as Hammerton Studio. We use a three-step process that has been certified by the American Architectural Manufacturer’s Association (AAMA) to withstand UV fading and corrosion caused by sunlight, ocean air, humidity and extreme temperatures. In fact, our outdoor fixtures are guaranteed to last for as long as you own them.

STEP ONE: MATERIAL & CONSTRUCTION

Hammerton Studio outdoor fixtures are fabricated in naturally corrosion-resistant aluminum, which stands up to the harshest climates when properly pretreated and finished. Unlike most lighting manufacturers, we also design our outdoor products so that each component can be pretreated and finished prior to assembly, which eliminates the presence of microscopic voids that can trap corrosion causing moisture.

STEP TWO: MARINE GRADE PRETREATMENT

Similar to iron rust, the chalky white powder often seen on outdoor aluminum fixtures is caused by oxidation. Hammerton Studio outdoor fixtures are pretreated with a marine grade chromate conversion coating to resist this oxidation and provide an added measure of protection against the corrosive effects of salty ocean air and humidity. While most manufacturers forego this process because it’s expensive and time-consuming, pretreatment helps us deliver the most durable outdoor lighting solution on the market today.

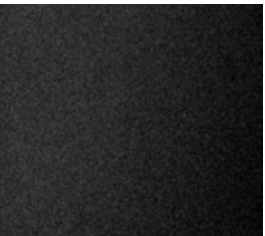

STEP THREE: AAMA 2604 FINISHES

Made from super durable polyester resins, AAMA 2604 powder coat finishes provide superior protection against UV rays, weathering, and corrosion, and they have been rigorously tested to ensure color and gloss retention in coastal and tropical climates. In fact, they’re the same quality and grade of finish that’s used on aluminum clad skyscrapers. We offer three colors of AAMA 2604 all-climate finishes.

- ✓ Weather & Corrosion Resistant
- ✓ Rich Color & Character
- ✓ Superior Hardness
- ✓ Green/LEED Compliant
- ✓ Lifetime Limited Warranty

NEW MESA COLLECTION

New in 2023, Mesa brings nature-inspired drama to familiar lighting silhouettes. Three new diffuser designs, each featuring beautifully striated crystal glass blown in-house by Hammerton artisans, evoke the rugged beauty of Southwest landscapes. We showcase this captivating look in a broad series of popular wall and ceiling styles shown on these pages.

NEW TESSERA COLLECTION

The 2,500-year old art of glass mosaic tiling is brought to light in this brilliant series of sleek indoor and outdoor fixtures. Integrated LED light showcases the visual intrigue of interlocked tiles in artisan cast crystal glass. Clean lines, simple forms and surprising handcrafted details make Tessera an enormously versatile lighting solution for modern and contemporary interiors.

Tessera offers a choice of two glass motif options. For Tessera outdoor lighting, see page 234.

MULTI-PENDANTS

NEBULA BLOWN GLASS MULTI-PENDANT CHANDELIERS

Nebula glass is available in ten standard multi-pendant canopy configurations. Choose your favorite glass style from the pendants on the facing page, or combine all three in a Cosmos multi-pendant chandelier. Pendants and multi-pendant chandeliers can be ordered with either an LED-lit cast glass diffuser or an E26 40W base for incandescent lighting. Each ships with 10' of field-adjustable suspension cord per pendant. This provides a maximum OAH of 19" - 137" depending upon the blown glass style. Custom canopies and longer cords are also available.

Custom Gem and Rock Crystal
Multi-Pendant Chandelier

CUSTOM LIGHTING IN MINUTES

MULTI-PENDANT CHANDELIER CONFIGURATION OPTIONS

Now it's easy to customize Hammerton Studio multi-pendant chandeliers. In just a few quick steps you can mix and match colors, styles and sizes of your favorite blown glass pendants with your desired canopy and calculate your price. Find the multi-pendant configurator at configure.hammerton.com.

1. Choose Your Canopy

Ten standard configurations accommodate most installations. Each includes 3-12 pendants.

2. Choose Your Pendants

Mix and match from six pendant styles in a selection of colors, sizes and diffuser options. Note that incandescent and LED pendants cannot be combined under the same canopy.

3. Choose Your Canopy Finish and Cord Color

Each pendant ships with 10' of field-adjustable braided cord. Additional cord can be ordered for a modest upcharge.

4. Calculate your Price

Use our online multi-pendant customization tool to record your selections and dynamically calculate your fixture price.

AALTO COLLECTION

Inspired by famous Finnish architect and designer Alvar Aalto, this popular collection reflects Mr. Aalto’s tenet of ‘Gesamtkunstwerk’, or a total work of art. A unique geometric blown glass shade design nods simultaneously to vintage and modern style, while integrated LED showcases the visual intrigue of the ribbed crystal glass.

The Aalto collection includes a wide selection of wall and ceiling fixture designs. Configure any Aalto fixture in your choice of four glass colors and eight standard finishes, with 2,700K or 3,000K CCT LED.

ASSCHER COLLECTION

Brilliant in both style and substance, the Asscher collection brings enchanting elegance to minimalist fixture styles. Sleek rows of symmetrical channel-set diffusers, each individually crafted in clear crystal glass by Hammerton artisans, evoke the look of iconic diamond jewelry designs.

The Asscher collection includes a ring chandelier, linear chandelier and sconce in 3,000K integrated LED and a wide choice of finishes.

AXIS COLLECTION

This top-selling collection features thick rectangular rods of artisan cast crystal glass, brilliantly salvaged from Hammerton’s glassblowing operations. Integrated LED illumination creates a prism of dramatic refracted light that simply can’t be matched by high-production acrylic substitutes.

The Axis collection includes a selection of chandeliers, sconces and pendants in a choice of 2,700K or 3,000K integrated LED and several finishes.

AXIS

AXIS MODA LINEAR CHANDELIER

This dramatic modular design allows for customization of the angle and height of each Axis rod. More dramatic angles and separation between rods may be ideal for modern spaces and higher ceilings, while a tighter silhouette better suits softer contemporary spaces and lower ceilings. Each piece of artisan cast crystal glass beautifully diffuses ambient light, while cleverly concealed downlights provide additional task lighting.

BLOSSOM COLLECTION

Undulant ‘blossoms’ of LED-lit hand-blown crystal glass nod to an organic aesthetic that exudes casual sophistication. The look is soft, relaxed, and surprisingly unique. Each glass diffuser is a one-of-a-kind artisan creation reflecting the combined talents of Hammerton’s metal and glass fabrication teams.

The Blossom collection includes a wide selection of wall and ceiling fixtures in a choice of 2,700K or 3,000K integrated LED and several finishes. Blossom multi-pendant chandeliers are shown on page 48.

FIORI COLLECTION

This playful re-interpretation of classic lighting silhouettes features glowing white buds of artisan blown glass, each handcrafted in our Salt Lake City facility. 3,000K integrated LED light gives the glass a rich luster and opacity that’s reminiscent of mid-century Italian art glass. Fiori is Italian for ‘flowers’, but the look is as sculptural as it is organic.

The Fiori collection includes a wide range of wall and ceiling fixtures shown on these pages, as well as several multi-pendant chandelier configurations shown on page 51.

GEM COLLECTION

Inspired by the idea of lighting as jewelry for the home, this iconic collection features asymmetrically faceted diffusers in artisan blown crystal glass that evoke the look of rough-cut gemstones. Each Gem diffuser is illuminated with integrated LED, eliminating the visual distraction of a filament bulb. Gem fixtures emit a captivating glow that adds surprising drama to surrounding spaces.

The Gem collection includes a wide selection of wall and ceiling fixture designs. Configure any Gem fixture in your choice of four glass colors and eight standard finishes, with 2,700K or 3,000K CCT LED.

GLACIER COLLECTION

Ice or diamonds? You decide. Regardless, the Glacier collection elevates recycled glass to functional art.

Glacier pairs sleek metalwork with thick crystal glass crafted using excess material from Hammerton’s glassblowing operations. The unique characteristics of this artisan cast glass allows it to dramatically refract light in surprising ways. Choose from a wide selection of wall and ceiling fixtures in a choice of 2,700K or 3,000K integrated LED and several finishes.

The Ledgestone Linear Chandelier includes a matching rectangular canopy and height-adjustable rods that ship in 3", 6", 12"(2) and 24" threaded segments. The Ledgestone Pendant includes a matching round canopy and 10" of field-adjustable braided cord. Integrated LED with 93+ CRI is standard for all Ledgestone products, in a choice of 2,700K CCT (L1) or 3,000K CCT (L3). For complete product specification details and drawings, visit studio.hammerton.com. Measurements are listed in inches.

NEBULA COLLECTION

This luxurious pairing of blown and artisan cast glass is all about aesthetics. Softly undulant handblown glass shades are illuminated with beautiful LED-lit artisan cast glass diffusers, elevating the glass globe pendant to an intriguing artisan statement piece.

Nebula includes three blown glass shades and three cast glass diffuser styles, so you can pair your favorite glass shade with your preferred diffuser. Nebula lights can be also ordered with incandescent lamping for a more traditional look. Configure any Nebula fixture in a choice of four glass colors and several finishes.

OPTIC BLOWN GLASS COLLECTION

Very few decorative lighting styles captivate the eye quite like Hammerton Studio Optic Blown glass.

Artisan blown in our Salt Lake City glass studio, each Optic Blown Glass diffuser is crafted from up to five pounds of Swedish crystal glass and achieves its stunning visual effect from a molten glass ribbon that is hand-wrapped around each piece during fabrication. Due to the handcrafted character, no two are exactly alike.

This popular collection includes Coppa, Ellisse and Terra blown glass styles, each illuminated with incandescent lamping that takes one 40W bulb. Choose from four glass colors and four metallic finishes.

Multi-pendant chandelier configurations are shown on page 54.

PEBBLE COLLECTION

Inspired both by nature and classic jewelry, the Pebble collection nods equally to contemporary and modern style. Beautifully finished precision-machined metalwork provides the perfect foil for softly illuminated rondelles of artisan cast crystal glass, each handcrafted in Hammerton’s glass studio.

The deceptive simplicity of this collection makes it enormously versatile. Set in a luxuriously styled urban interior, the look evokes the allure of bezel-set cabochon jewels. In a contemporary mountain resort home, it echoes the glint of tumbled stones at the bottom of a nearby stream bed.

The Pebble Collection is offered in 2,700K and 3,000K integrated LED, and a choice of several finishes.

ROCK CRYSTAL COLLECTION

Balancing elements of organic and modern design, this sparkling collection evokes the magical charm of natural quartz crystals in beautiful artisan blown glass. Integrated LED illumination showcases the unique shape and texture of the glass diffuser without the visual distraction of a filament bulb.

The Rock Crystal collection includes a wide range of wall and ceiling fixtures shown on these pages, as well as several multi-pendant chandelier configurations shown on page 56.

STELLA COLLECTION

This inspired collection brings celestial intrigue to a minimalist fixture design, with sparking LED-lit geometric diffusers in artisan cast crystal glass that appear to twinkle like stars. Hammerton glass artisans create these diffusers one at a time, by pouring molten glass into steel jigs that are designed and built in-house.

The Stella collection includes pendant, scone and several chandelier styles in 3,000K integrated LED, with a choice of finishes.

CARLYLE COLLECTION

Inspired by the classic elegance of its namesake Manhattan hotel, the Carlyle collection subtly nods to sophisticated Art Deco style. Bold geometries, sleek lines and rich steel finishes capture a timeless aesthetic that’s perfectly suited to a wide range of interiors. Most fixtures offer a selection of domestically hand-textured art glass shades and lens materials.

IRONWOOD COLLECTION

'Rect tube' - industrial rectangular-shaped steel tubing - is an unusual choice for organic lighting design, but the results are striking in the Ironwood Collection. Our artisans hammer and sculpt this rugged material into a surprisingly elegant interpretation of the natural world that suits a broad range of interior styles.

Choose from four handcrafted glass styles and eight standard finishes.

TEXTURED GLASS COLLECTION

Art glass serves as craftsman’s canvas in our versatile Textured Glass collection. Drum, square and multi-pendant chandeliers, linear chandeliers, pendants, sconces and vanity lights are offered in six glass styles shown below. Each piece of textured glass requires skilled artisan precision and up to two kiln passes to achieve its visual appeal.

It’s rare to find drum chandeliers made from artisan glass because the kiln firing process rarely results in glass panels that are identical in dimension and alignment. But take a close look at our Textured Glass drums like the ones shown on these pages. You’ll see seamlessly aligned glass panels every time.

URBAN LOFT COLLECTION

This versatile collection offers a modern interpretation of the Arts & Crafts movement. Functional pins and straps are elevated to decorative details, while beautifully handcrafted kiln-fused art glass extends the artisan story through shades and diffusers in four styles. Gritty yet sophisticated, Urban Loft lights are equally at home in a converted warehouse flat, a stylish midtown apartment or a contemporary mountain retreat.

Choose from four glass styles and several finishes.

DOWNTOWN MESH

When common materials are used in uncommon ways, the result is often magical. Who would guess that slotted heavy gauge steel mesh- the same rugged stuff that’s used for sorting quarry rocks- could transform the look of a light fixture?

The Downtown Mesh collection captures the intrigue of this industrial material by evoking a sleek urban aesthetic that transcends its utilitarian nature. Depending upon your preferred fixture and style, pair the heavy gauge mesh diffuser with frosted artisan glass or a crisp white linen shade. Or omit the shade and add vintage-style Edison bulbs for a more industrial look.

DOWNTOWN MESH / BEHIND THE DESIGN

Inspiration comes from many places. In the case of Downtown Mesh, it was from a dumpster.

While working on a personal project, one of our product designers pulled a large piece of this rugged stuff from an industrial recycling bin. Intrigued by the interplay of ripple and parallel wires in the screen material, he set to work bending and shaping it in round and rectangular forms.

A few months later, the Downtown Mesh collection was introduced, and today it's one of our best selling Hammerton Studio designs.

TEMPEST COLLECTION

Swirling bands of smooth metal bring an urban aesthetic to this popular collection. Heavy 12-gauge steel, handcrafted construction and a sophisticated asymmetrical design give Tempest its bold look. No thin metals, no stenciled patterns, no repeats.

The Tempest collection layers its signature steel bands with either a frosted glass diffuser or a crisp linen shade. Or go with bare bulbs for a more industrial vibe. Finish the look with a choice of eight metallic finishes.

TWEED COLLECTION

A contemporary reinterpretation of the iconic fabric shade, our Tweed collection showcases diffusers crisply crafted from loosely woven straps of heavy gauge steel.

Distinctive yet familiar, the look is surprisingly versatile. When paired with vintage bulbs, Tweed fixtures take on a gritty urban aesthetic. When layered with a white linen shade or frosted cylinder, they exude surprising warmth. Pair your preferred look with one of eight metallic finishes.

UPTOWN MESH COLLECTION

As a diffuser material, there's no match for fine woven steel mesh. Mesh emits strength and softness, volume and airiness, warmth and sophistication — all simultaneously. Substitutes like perforated or stamped steel can't begin to match its ethereal elegance.

Our Uptown Mesh collection showcases the urban sophistication of this remarkable material. Depending upon your preferred fixture and style, you can complement the fine mesh diffuser with a white linen shade, frosted glass, or exposed lamping. The Uptown Mesh pendant can also be paired with beautiful LED-illuminated artisan cast crystal glass diffusers, as shown here.

OUTDOOR COLLECTION

There’s no question that decorative outdoor lighting needs to check a lot of boxes. Aesthetics, weather resistance, environmental compliance, energy consumption and maintenance are all major considerations. But very few outdoor lighting brands solve for every one of these.

Hammerton Studio is different. Our exterior lights combine leading architectural design with all-climate AAMA 2604 finishes that provide the industry’s highest standard for UV and corrosion resistance. Most of our fixtures are ‘Dark Sky’ certified by the International Dark Sky Association (IDA). All include integrated LED lamping to minimize energy usage and maintenance, and all can contribute toward LEED credits of the U.S. Green Building Council.

The best news? All our Hammerton Studio outdoor fixtures include a lifetime limited warranty, so they’re guaranteed to last for as long as you own them.

ARCHITECTURAL QUALITY DESIGN & CRAFTSMANSHIP

Intelligent design, durable materials and meticulous craftsmanship are foundational to our outdoor collection. Each fixture is thoughtfully designed to complement today’s leading architectural styles, and we sweat the details to ensure long-lasting performance: engineering, construction, materials, fabrication and finish. The magic happens when each fixture comes to life in the hands of our talented artisans, who coax form and beauty from metal and glass.

ALL-CLIMATE UV & CORROSION RESISTANCE

The dirty little secret about most decorative lighting is that it rarely looks as good as the day it’s installed. Harsh climate factors like sunlight, ocean air, humidity and extreme temperatures can cause fixtures to fail in a matter of months, particularly in coastal and tropical areas.

That’s why Hammerton Studio outdoor lights are built to last. We use a three-step process that’s been rigorously tested by the American Architectural Manufacturer’s Association (AAMA) to withstand UV fading and corrosion damage. Each fixture is fabricated in naturally corrosion resistant aluminum, marine grade pretreated, and finished with super-durable AAMA 2604 powder coats in a choice of three beautiful colors:

TEXTURED BLACK (TB)

ARGENTO GREY (AG)

STATUARY BRONZE (SB)

OUTDOOR

IDA DARK SKY COMPLIANCE

‘Dark Sky’ refers to the absence of artificial light in the night sky, which has become an increasingly rare phenomenon. Skyglow obscures the stars from our sight and prevents us from experiencing a natural night sky. Even more important is the devastating impact of artificial light on virtually all plants and animals, which has been well documented by scientific research.

Most Hammerton Studio outdoor lights have been certified by the International Dark Sky Association (IDA), which is the lighting industry’s authoritative voice on night sky light pollution. IDA-approved lights minimize glare, reduce light trespass and don’t pollute the night sky.

An increasing number of municipalities and planned communities nationwide are mandating the use of IDA Dark Sky compliant outdoor lighting. Look for the IDA certification seal throughout these pages.

AC LED LAMPING

Particularly for larger homes with multiple outdoor fixtures, energy consumption and maintenance are big issues. Hammerton Studio outdoor fixtures offer an AC LED lamping option that consumes 10-20% of the energy of incandescent bulbs and lasts up to 25 times longer, so it’s an ideal choice for exterior lighting.

LIFETIME LIMITED WARRANTY

We have invested significant resources to research, develop and implement industry-leading materials and practices to ensure that Hammerton Studio outdoor lighting leads the industry in fixture quality and durability, and we back this up with a lifetime limited warranty. This warranty applies to the original purchaser for the lifetime of the fixture, for residential use only.

SQUARE & HALF ROUND COVER SCONCES

Slim design, optional metalwork and a choice of sizes and glass colors makes these two fixture styles ideal for most outdoor wall applications. Each can be ordered with either 3,000K AC LED or a GU10 base that takes one MR16 bulb (not included) and ships with optional metalwork detail. **For IDA Dark Sky compliance, configure your fixtures with Bronze Granite or Smoke Granite glass.**

OUTDOOR

RANCH & FARMHOUSE LIGHTING

At last: thoughtfully designed and durably constructed barn lights that will look great for years to come!

The gentle curves of our Ranch lighting create a timeless vintage look that’s ideal for traditional exteriors, while our Farmhouse lighting combines the clean lines of contemporary design with a time-honored silhouette. Part modern, part country, this look beautifully echoes the harmonious juxtaposition of old and new that characterizes the Modern Farmhouse aesthetic.

Each style is available in a sconce, pendant and post mount, and includes 3,000K AC LED lamping to minimize energy consumption and fixture maintenance. **For IDA Dark Sky compliance, choose Ranch lighting.**
