ART IN DESIGN

New from Hammerton Signature, Pyrite celebrates the unique characteristics of this reflective material in its unearthed form. Shining cubes of hand-hewn steel and artisan-blown crystal capture its striated texture and structural intergrowth, elevating what's commonly known as fool's gold to functional art. Available as a 54-inch-wide linear chandelier (shown) and an 18-inch-high pendant, both with 3000k integrated LED. hammerton.com
